

issue:1152

2006 Summer Issue Vol. 2, No. 2

Teaching, Learning, and Assessment Processes

- [Knowing What I Know: An Investigation of Undergraduate Knowledge and Self-Knowledge of Data Structures](#)
- [The Development of Adaptive Expertise in Biomedical Engineering Ethics](#)
- [Characterizing Discourse Among Undergraduate Researchers in an Inquiry-Based Community of Practice](#)
- [Everyday Problem Solving in Engineering: Lessons for Engineering Educators](#)
- [Combining Modern Learning Pedagogies in Fluid Mechanics and Heat Transfer](#)
- [Expert and Student Conceptions of the Design Process: Developmental Differences with Implications for Educators](#)
- [Teaching Science with the Social Studies of Science for Equity](#)
- [What Resources Do CS1 Students Use and How Do They Use Them?](#)
- [Assessment of an Engineering Ethics Video: Incident at Morales](#)
- [A First Look at Novice Compilation Behaviour Using BlueJ](#)

Teachers and Learners

- [MentorNet: E-Mentoring for Women Students in Engineering and Science](#)
- [The ACT and High School GPA as Predictors of Success in a Minority Engineering Program](#)
- [Factors Influencing the Self-Efficacy Beliefs of First-Year Engineering Students](#)
- [Teams that Work: Campus Culture, Engineer Identity, and Social Interactions](#)

Courses, Laboratories, Curricula, Instructional Materials, and Learning Technologies

- [Hands-On CFD Educational Interface for Engineering Courses and Laboratories](#)
- [Teaching the Tacit Knowledge of Programming to Novices with Natural Language Programming](#)

Diffusion of Educational Innovations

- [A Systems Model of Innovation Processes in University STEM Education](#)
